

## Downloadable Audio Book Of 100 People Who Are Screwing Up America

Are you proud of who you are, your conduct, self discipline and what you are as a human being and American? Do you still wear a white shirt, suit and tie to work and when you go out on a date with your girl friend or family? Are you one of the few people who curses little or not at all? Do you sometimes wonder about who started the downhill slide in America, and the world, that started decades ago? I have found a lot of the guilty culprits in a book by Bernard Goldberg. There is now an abridged version of this reading book that is available as an audible version in the downloadable audio book of 100 People Who Are Screwing Up America. They should add, the world, to this title also because the aura of civility that used to be world wide has spread, in the wrong direction, like an unhealthy virus to the whole Planet Earth. A downloadable audio book is a printed book that has been put into an audio or sound format file. The printed versions of books started to go down about 10 years ago when young authors and their promoters or agents learned that they could literally publish whole books on line. This leveled the playing field between established and beginning authors. A sharp difference between an audio iTunes type audio book and a printed book is the real life part of it. You can literally feel the warm, cool or heated breath of the narrator or, in this case, actual author of a book. It comes with their voice out of your pc speakers, ipod or cd. You can hear background music that dramatizes the points the authors want to make. You are dealing with a human being committed to the content of the book so the drama deepens dramatically with their reading of their reading book with their passion added to it. This is not possible with a printed book. Although it is an iTunes audio book and recorded you can feel the emotional fire and passion from the speakers of your pc, mp3 or ipod. There is surely no boredom here as the author, Bernard Goldberg, is clearly flaming angry at the 100 People Who Are Screwing Up America. You will like the passion here as he goes through his list of these rascals one by one. You can get a free sample of this fiery audio book that is five full minutes long. If you like it and want to know more you can get the whole full six hour abridged version of the 100 People Who Are Screwing Up America on an audio book that is downloaded from the web site promoting it in an mp3 format. If you are as straight laced as I am you will be disappointed and angry with the people who have made this loser list. In this reading book audio version you will listen to Bernard Goldberg as he takes dead aim at the America bashing cultural elites who look down their snobby noses at ordinary Americans, and people of all countries, and detest so much of what this country is all about. The Hollywood Blowhards who are incredibly dizzy celebrities who think they are smart because they are famous. Also featured are TV Schlockmeisters, including the one whose show has been compared to a churning mass of maggots devouring rotten meat. Included are the Intellectual Thugs, big wigs at some of our best colleges, whose views run the gamut from left wing to far left wing. Goldberg does name names, profiling the villains in his rogue gallery, one by one, from 100 down or up to the number one jerk. You know who is number 37. Goldberg does not just round up the usual suspects we have come to know and get angry at. He also reveals some of the people who operate away from the limelight but still manage to yank a lot of strings and do all sorts of harm to the American and World culture. This downloadable audio book of 100 People Who Are Screwing Up America is a serious reading book because it reveals those who endanger what is left of our civil lifestyle in America. Sometimes it is discounted at a lower price on the web site. You can find it on the web site by clicking in the name of it in the source box at the top of the page. Now that you know about it you can get this entertaining and unfortunately real audio book. You can listen to it piece by piece of fifteen or thirty minutes at a time and make it all your own. It can be played repeatedly so you can go back to different parts. You can also burn it onto a cd and put it on an ipod.

### About the Author
