

## Working on Cars? Keep a Unitized Plastic First Aid Kit Around for Those Little Emergencies

When it comes to protecting you and your cherished family and friends, you recognize the importance of having a high quality and professional unitized plastic first aid kits. Those kits are easy to use and easy to understand. They usually start at a 61-piece unit which will carry everything you need to quickly treat an emergency, and can hold you over for most circumstances until help arrives in many cases. The case has a handle made for easy carrying, and there is even a wall mount which allows for instance access. The contents are snugly placed in this plastic case which means you are going to have less shifting. Each of the items are individually wrapped to insure cross contamination is minimized, and you will easily be able to replace the contents with the permanently affixed sticker on the inside that has a list of the contents. What can you expect to find in this 61-piece unitized plastic first aid kit? Adhesive plastic bandages - When you need bandages you will find this kit has a multitude of bandages individually wrapped for your protection. When it comes time to restock these individually wrapped bandages, you will not have to fight and struggle. Instead, you will even find it easy to reorder. Small adhesive bandages to large adhesive bandages are included to insure you have bandages for every situation. Non-stick pads - If you do not want to have an adhesive plastic bandage, you may find these nonstick pads extremely useful. In addition to being used as a bandage, these can be used to stop the bleeding. Or place on top of a wound to keep contaminants out until help arrives. These nonstick pads are wonderful and a must for any reputable and reliable unitized plastic first aid kit. Triple antibiotic ointment - There is nothing as recognizable as being beneficial to the healing process as triple antibiotic ointment. These just happen to be individually wrapped for your convenience. Simply massage the individually wrapped package of triple antibiotic ointment and apply to a clean wound to promote healing. These are easy to replace, and since they are individually wrapped, will have a longer life expectancy. Alcohol cleansing pads - When it comes to cleaning a minor wound, there is nothing quite like the cleaning power of isopropyl alcohol. These alcohol cleansing pads will offer you the ability to properly cleanse any minor wound in preparation for doctoring. Instant cold compress - While these have not always been a necessity in unitized plastic first aid kits, these are today an important part of the whole case. These are ready in an instant to be used as an instant cold compress to slow down swelling and offer relief. Scissors - No matter what kind of unitized plastic first aid kits you have, you will find that scissors offer many benefits. You can snip bandages to the proper size, snip open individually packed items, or even snip clothing that can be in the way. You may find it necessary to run an alcohol pad over the blades when finished to insure they are not contaminated. You simply get more when you use unitized plastic first aid kits.
